Kambalda West Project Drilling Commences at 5B Nickel Project

9 February 2004

5B Nickel Project

Breakaway Resources Limited today is pleased to announce the commencement of drilling at its wholly owned 5B Nickel Project. The 5B Nickel Project is the second of Breakaway's advanced development targets on the Spargoville tenements, 20 kilometres west of Kambalda. Compilation of previous surface and underground exploration data has defined an in-situ resource of 195,000 tonnes grading 1.8% nickel to a vertical depth of 175 metres.

Breakaway has commenced a 12 hole RC and diamond drilling program totalling 1,465 metres, targeting the 40 metre vertical interval zone from the base of the existing 5B open pit to the top of the defined resource model (figure 1). This drilling program is designed to upgrade and increase the 5B resource model for inclusion into joint development with the 5A Nickel Project. The 5A Nickel Project is approximately 1 kilometre north of 5B Nickel Project and is currently in the final stages of feasibility.

The Company anticipates drilling results will be announced as they become available.

Yours faithfully

Michael Mulroney
Managing Director
