#### **LOONGANA LIME PTY LTD**

We advise that we have closed the vertical shaft kilns due to both environmental and production problems. We need to overcome this by changing the fuel source to natural gas. The time for the changeover is estimated to be 6 months.

In the meantime we will be required to re-structure our operations at both Parkeston and Rawlinna that may have an impact on the company.

We expect the changes will have a positive effect on the financial performance of the company.

By Order of the Board

John Hocking  
Chairman
